

Dear Macsteelers,

We are pleased to announce that our Company will be implementing a new online recruitment system designed to streamline our hiring process, and improve the overall candidate experience. This new system will allow us to efficiently manage applications, track candidate progress, and maintain a comprehensive database of potential hires through an online portal.

Before the new system goes live, we will be providing training sessions to all employees. The training is focused on how to professionally write and format a CV and how to upload CV onto our e-recruitment. Once employees have been trained and we go live, employees will no longer be able to submit manual applications for vacant positions.

Please note that attendance at these training sessions is highly essential for employees. A well-prepared CV not only enhances your professional image, but also significantly improves your chances of securing desired roles within the Company.

HR will arrange training dates in conjunction with management. For any further information, please do not hesitate to contact the HR department.

Kind regards

Logan Erasmus  
Psychometrist
